NATIVITY OF MARY SCHOOL
STAR RENAISSANCE TESTING DATA

WHAT IS STAR TESTING?

STAR Assessments are short tests that provide teachers with personalized learning data for each student. STAR tests are computer adaptive, which means they adjust in difficulty to each answer students provide.

HOW IS STAR TESTING IMPLEMENTED AT NATIVITY?

At Nativity, we utilize the STAR assessment tool to screen and benchmark students in grades K-8 in reading and math. This computer based test is completed individually, three times a year (fall, winter & spring), within defined testing windows.

WHY DO WE NEED STAR TESTING?

Ensuring students meet New York State standards and acquire essential literacy and math skills requires diligent monitoring and assessment. The STAR assessment program evaluates student progress comprehensively.
